

NOVEL MEMBRANE PROTEINS OF *HELICOBACTER PYLORI*

ABSTRACT OF THE DISCLOSURE

The invention relates to proteins of *Helicobacter pylori*, in a substantially purified forms, that can be obtained from a membrane fraction of *H. pylori* and of which the molecular weights after electrophoresis on a 10% polyacrylamide gel in the presence of SDS are approximately 54, 50, 32-35, or 30 kDa.
